TECHNICAL DATA SHEET

EN 1176	+ 3 years	63 users	992 x 547 x 330 cm	230 cm.	76 m ²

Structure	Galvanised steel, powder coated with polyester
Panels	19 mm HDPE (high-density polyethylene)
Dams	Resin and quartz sand
Ropes	Reinforced with steel core and PP multifilaments
Bars	Stainless steel
Slider	150 cm straight stainless steel tube

4 px.	60 h.	2365 kg

ONYX (Slide Stainless Steel)

ONYX is the extended configuration of the range, combining three different modular sets – CORAL, AMBER and MICA – joined by a walkway with side ropes and a 60.3 mm diameter stainless steel tube.

- CORAL forms a three-module spiral structure that encourages three-dimensional exploration. It features an inclined rope climb and double fireman's pole on either side.
- AMBER combines two diagonally connected modules, with a closed stainless steel tube slide at a height of 150 cm and a ladder and fireman's pole with curved side tubes to facilitate ascent and descent.
- MICA consists of three modules arranged in a staggered formation, offering a dynamic climbing experience that encourages children to explore more challenging climbing routes

The **ROCKS** range offers climbing wall structures designed to encourage active play, coordination and physical development in children through climbing. Each module is manufactured with a robust galvanised steel structure and polyester powder-coated finish, and 19 mm thick high-density polyethylene (HDPE) panels, materials that are highly resistant to intensive use and outdoor conditions.

The climbing holds allow children to tackle small physical challenges in a fun way, developing strength, balance and strategic thinking as they explore different climbing routes. The interior of the modules features climbing ropes that facilitate access and expand the possibilities for play, promoting physical activity and exploration from multiple angles.

HIC		
	100 cm.	5,3m2
	150 cm.	8,4m2
	180 cm.	17,6m2
	200 cm.	10,2m2
