TECHNICAL DATA SHEET

EN 1176	+ 3 years	100 users	1238 x 1231 x 360 cm	200 cm.	120,20 m ²

Structure	Galvanised steel, powder coated with polyester
Panels	19 mm HDPE (high-density polyethylene)
Pins	Resin and quartz sand
Ropes	Reinforced with steel core and PP multifilaments
Bars	Stainless steel
Slider	240 cm straight polyethylene tube + 140 cm straight polyethylene tube

4 px.	120 h.	2563 kg

DIAMOND is the expanded configuration of the range, combining four different modular sets – JADE, AMBER, MICA and OPAL – joined by a walkway with side ropes and a 60.3 mm diameter stainless steel tube.

- **JADE** stands out for its vertical design of three modules with a 240 cm straight closed polyethylene tube slide and a fireman's pole ladder with curved side tubes that test coordination and strength.
- **AMBER** combines two diagonally connected modules, with a closed polyethylene tube slide at a height of 140 cm and a fireman's pole ladder with curved side tubes that facilitate ascent and descent, offering an accessible and versatile experience.
- **MICA** consists of three modules arranged in a staggered formation, offering a dynamic climbing experience that invites children to explore more challenging ascending routes.
- **OPAL** is the compact module that acts as a link between the two sets.

The **ROCKS** range offers climbing wall structures designed to encourage active play, coordination and physical development in children through climbing. Each module is manufactured with a robust galvanised steel structure and polyester powder-coated finish, and 19 mm thick high-density polyethylene (HDPE) panels, materials that are highly resistant to intensive use and outdoor conditions.

The climbing holds allow children to tackle small physical challenges in a fun way, developing strength, balance and strategic thinking as they explore different climbing routes. The interior of the modules features climbing ropes that facilitate access and expand the possibilities for play, promoting physical activity and exploration from multiple angles.
